SOFTWARE ENGINEER

Over 20 years of experience in multiple industries including tech, hospitality, training and music, with an eagerness to learn new skill sets and a focus on continuous improvement. Pursuing a career in software engineering at the intersection of creativity and programming. Adaptable problem solver with a calm, purposeful work ethic.

TECHNICAL SKILLS

JavaScript - React - Ruby - Rails - AWS - HTML - CSS - Docker - Git - Bootstrap - Logic - ProTools - Ableton - Photoshop

TECHNICAL PROJECTS

ATX Onstage - Website
Live music show-list and recommendation application for Austin area venues

The Song Sifter - Github | Demo
Musical idea generator for writing and arrangement, as well as fostering a sense of community amongst fellow artists.
- Built a complete full-stack unique project with Ruby/Rails backend and Javascript/React frontend
- Utilized authentication and authorization for secure user experience and deployed app via Heroku
- Leveraged Rails console, byebug, and Postman for testing, debugging, and troubleshooting
- Implemented filtering logic for users to search based on their preferred parameters

Beer Bites - Github | Demo
Web based app for suggestions on libations, food-pairings and local breweries
- Worked with Bootstrap component library for consistent layout and handled multiple API calls based on user inquiry
- Collaborated with pair-programming to divide the workload and deliver timely results using Github for organization
- Designed our schema layout and project functionality with Draw.io to showcase an MVP prior to writing any code
